

Hi Krysia,

In order to transfer to our practice you will need to contact your previous physician and request that her records be sent to us. If she has an extensive medical history we would like all the records. If she is healthy we need her immunizations and last physical exam. We will need at least her immunization record to see her in the office so if you need an appointment right away, request that they fax the record to us at 716-631-8690. If your insurance requires a primary care doctor, you will need to contact them to change it to one of our doctors. Please choose either Dr. Sheliah Roehmholdt, Dr. Erin Watson, Dr. Jennifer Trask, or Dr. Amos Moberg. Our policy is that you can choose which doctor you want to see for routine checkups but when your child is ill you see the "sick" doctor on for that day. We have same day appointments for sick children. Last but not least, at your convenience, call our office and we can get all your insurance information and set up your appointment if needed. If you would like to meet with one of our doctors first before deciding to switch to us, you can just call and ask to set up a new patient consultation. We look forward to meeting you and your daughter! Have a great day.
